

What is Omega-3?

Omega-3 fatty acids can be obtained from wild ocean fish. It is rich in polyunsaturated fatty acids, mainly EPA and DHA. These two fatty acids are vital for the brain and intelligence development of human, especially for children. However, human body cannot synthesize these fatty acids and therefore they can only be obtained from diet.^[1] Some children may not obtain enough Omega -3 from diet because they resist the smell of fish oil. Therefore, taking fish oil softgel capsules as dietary supplement may ensure sufficient intake of omega-3 fatty acids.

Omega-3 Fish Oil and Children's Learning & Behavior

Fish oil is rich in Omega-3, which contains two essential fatty acids: docosahexaenoic acid (DHA) and eicosapentaenoic acid (EPA). Omega-3 can facilitate brain development in children, helping them concentrate and improve their behavior as well as enhancing their potential and ability.^[2-3] Studies show that children deficient in Omega-3 essential fatty acids may have more behavioral problems, such as hyperactivity and learning difficulty.^[3] Therefore, adequate intake of fish oil softgel capsules would be the best choice for those children who cannot obtain enough Omega-3 essential fatty acids.

Deficiency of Omega-3 Essential Fatty Acids may lead to:

- Allergies ^[1]
- Poor concentration ^[2-3]
- Hyperactivity ^[2-3]
- Excessive mood swing ^[1]
- Sleep difficulty ^[1]
- Reading problem ^[2-3]

Kids Chewable Omega 3 Fish Oil May Help:

- Promote learning ability ^[2-3]
- Improve attention and concentration ^[2-3]
- Improve hyperactive behavior ^[3]
- Promote memory and intelligence ^[2-3]
- Protect retina and support good vision ^[6]

High Quality of Chewable EPA-DHA Fish Oil

Smart Omega Chewable Fish Oil is made of high quality deep sea fish oil. Each softgel capsule is rich in EPA and DHA, with Colostrum IgG, Zinc, and Iodide, which are essential for supporting growth of children. It is probably the best one that provides multi-nutrients for children among its counterparts.

Smart Omega Chewable Fish Oil is manufactured in New Zealand and its manufacturing procedure is closely monitored by New Zealand Therapeutic Goods Administration (TGA) to assure the product quality and safety. It is an excellent supplement with delicious fruit flavor and both children and adults will surely love it.

Directions:

Children 3 years up: chew 1 softgel capsule daily.

Children 6 years up: chew 1-2 softgel capsules daily.

Children 12 years up: chew 2-3 softgel capsules daily or as directed by physicians.

Children can twist to open the tail of the softgel capsule. Squeeze the content into the mouth, or mix with milk, juice or your favorite drinks and food.
